## Philosophy: We Use GARP Approach To Provide Superior Risk Adjusted Return

---

# Portfolio Construction Process

## Three filters for inclusion in the investment universe

**Nifty 50, Nifty Midcap 100, BSE 200 and Top 250 stocks defined by AMFI are automatically part of the universe**

\* In companies with less than 10 years of data available, at least 70% of the years should have generated positive operating cash flows.

# Our Portfolio Construction Process Combines Top Down and Bottom-up Analysis

---

**1**

Top Down approach to study macroeconomic environment

**2**

Identify themes benefitting from structural trends

**3**

Study the full value chain

**4**

Identify areas where profit pools are concentrated

**5**

Use Bottom-up analysis to identify stocks benefitting the most from the profit pools

**6**

95% of any portfolio has to be from the investment universe

**Primary endeavor is to identify profit pools and stocks that benefit from them**

## Our Proposition

---

### Active Management

Endeavor to maintain minimal portfolio overlap vis a vis benchmark for genuine diversification

### Better Quality

We strive to construct portfolios with superior quality in terms of higher ROE versus the benchmark.

### Low Leverage

We prefer to buy companies with low debt to equity ratio as they tend to be resilient over the cycles.

### High Conviction Ideas

Concentrated portfolios with adequate diversification

# ASSET ALLOCATION SOLUTIONS

# Solutions

## PGIM India Dynamic Advantage Asset Allocation Facility (“DAAAF”)

A P/E Based dynamic Asset Allocation facility which allocates assets to equity and debt on a comparison of current market level and long term historical trend

**Rules based Asset Allocation**

**No market timing**

**Rebalancing Investments**

**Helps to manage volatility effectively**

## PGIM India Agelinked Investment Asset Allocation Facility

A Rule Based Asset allocation model which moves from aggressive to conservative investments with the investor’s age

### Rule of Thumb

$$100 \text{ MINUS AGE} = \text{EQUITY ALLOCATION}$$

Takes the “Guess-work” out of asset allocation

Virtual “Sliding Scale” that can work at any age

Greater risk taking in initial years when the scope for recovering from losses is higher

Gradually moves focus from accumulation to conservation of corpus
