PGIM INDIA MONEY MARKET FUND

An open ended debt scheme investing in money market instruments.
A relatively low interest rate risk and moderate credit risk scheme.

Rated A1+mfs by ICRA##

March 2023

Money Market Fund – A worthwhile option for the short term

A Money Market Fund is permitted to invest in money market instruments which are essentially discounted instruments viz. bank certificates of deposits, Commercial papers, T-bills etc. These instruments can be issued for a maximum maturity of 1 year. The fund enjoys investment flexibility since it can invest in instruments with 1 year tenor.

Why invest in PGIM India Money Market Fund?

The PGIM India Money Market fund is a “low to moderate volatility” fund that seeks to deliver reasonable market related returns through investments in money market instruments such as Commercial Papers, Bank Certificate of Deposits and T bills, all instruments with a maximum tenor of a year.

Portfolio Positioning* and Strategy

- The fund will invest across a range of money market instruments including Commercial Papers (CPs), Certificates of Deposits (CDs), Treasury Bills, Cash Management Bills (CMBs) and other discounted instruments with tenors not exceeding 1 year. CP investments are restricted to high grade CPs (with long term ratings of AA+/AAA)
- Positioning along the money market curve, depends on steepness and the potential roll-down opportunities that may arise from time to time.
- The Fund will be positioned based on an analysis of liquidity conditions, the shape of the yield curve and other macro-economic indicators.
- Currently, the mid segment of the money market curve looks more attractive and given the existing steepness in this portion, the fund is invested in the 4-9 month segment, . Hence, the average maturity of the fund is closer to the lower end of the band.
- Currently, the portfolio only comprises of AAA/A1+ rated securities and Sovereign Bonds.

Who should invest?

- PGIM India Money Market Fund is ideal for investors with the investment horizon of 6-12 months.
- Investors looking for investment avenues to park idle surplus funds for short term and with high liquidity and relatively low return volatility should consider this fund.

Fund Manager's View

- March 2023 may prove to be a turning point in the rate hike cycle being pursued by Central banks across the globe, as the US and European markets were roiled with a banking crisis, and the regulators had to step in to contain the fallout. Given the aggressive and the frontloaded rate hikes across the world, a bit of stress was expected at some point, and it came in the form of a mini banking crisis. Before the crisis unfolded, yields had risen on better than expected economic data and hawkish comments from the Fed / ECB officials as markets started to price in 50bps rate hike by the Fed. It all changed as the trouble started in US regional banks with the Silicon Valley Bank failing and Credit Suisse being taken over by UBS in a move engineered by the regulator. The US yield curve steepened with the US 2yr bond yield falling by almost 90 bps from its peak even as both the Fed and the ECB hiked rates but sounded dovish by acknowledging that the banking crisis will lead to tightening of financial conditions. The Indian Bond curve also steepened with the 2-5yr segment of the curve outperforming as yields in this segment fell by 20-25 bps whereas the yield on the benchmark 10yr bond fell by12bps.
- Taking cognizance of the banking crisis in US and Europe and the need to assess the Impact of the cumulative 250 bps policy rate hikes done since May of last year, the MPC paused in its April 6th Policy meeting while stating that it's not a pivot. The MPC also forecast a favorable inflation /growth dynamic by lowering its average inflation forecast for FY24 to 5.30% and increasing its GDP growth forecast to 6.50%.
- Liquidity management will become the focus over the next two quarters as the banking system's liquidity has reduced by almost INR 7 lakh cr over the course of the last one year and we expect that the current surplus liquidity will gradually reduce, bringing the focus back on liquidity management as there can be more instances of the MSF rate getting operational as and when liquidity in the banking system gets reduced. This will have implications for corporate bond spreads going forward as they are running quite tight from a historical spread perspective. We believe that the RBI is in for a long pause and we expect status quo on monetary policy to be retained over the next two quarters with a change in monetary stance to "Neutral "coming in at the August MPC Policy.
- The INR appreciated against the US dollar by 0.59% during the month as the Indian trade deficit and BOP came in better than expected and the US dollar also weakened. Brent fell during the month before a surprise production cut by OPEC+ led to a rise in prices in the first week of April.
- FPI flows into Indian Fixed Income markets were muted in March with marginal outflow of USD103 Mn taking the net inflow into debt at USD 357Mn on a CYTD basis.
- The incremental Credit / Deposit ratio of the banking system continues to be elevated with credit growth @15.00% and deposit growth@9.60% on a YoY basis putting pressure on short-term deposit rates and money market yields. This gap between the deposit and the credit growth rates means that the money market rates will continue to sustain at the current elevated levels with the flatness in the curve persisting.
- We expect the 10yr Benchmark bond to trade in a range of 7.10% to7.40% till April end.

About Us

PGIM India Mutual Fund is a wholly owned business of PGIM, the global investment management business of the US based Prudential Financial, Inc. (PFI). PGIM India Asset Management is the full service investment manager of PGIM India Mutual Fund, offering a broad range of equity and fixed income solutions to retail and institutional investors throughout the country. Macaulay Duration: The Macaulay duration is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price.

ICRA has assigned the "[ICRA]A1+mfs" (pronounced as ICRA A one plus m f s) rating to the PGIM India Money Market Fund. Schemes with "[ICRA]A1mfs" rating are considered to have very strong degree of safety regarding timely receipt of payments from the investments that they have made. Modifier {"+" (plus)} can be used with the rating symbol to reflect the comparative standing within the category. The ratings should, however, not be construed as an indication of the performance of the Mutual Fund scheme or of volatility in its returns For complete rating scale and definitions please refer to ICRA's Website www.icra.in or other ICRA Rating Publications ICRA Credit Quality Rating Methodology for debt mutual fund schemes. ICRA's mutual fund rating methodology is based on evaluating the inherent credit quality of the fund's portfolio. As a measure of the credit quality of a debt fund's assets, ICRA uses the concept of "credit scores". These scores are based on ICRA's estimates of credit risk associated with each exposure of the portfolio taking into account its maturity. To quantify the credit risk scores, ICRA uses its database of historical default rates for various rating categories for various maturity buckets. The credit risk ratings incorporate ICRA's assessment of a debt fund's published investment objectives and policies, its management characteristics, and the creditworthiness of its investment portfolio. ICRA reviews relevant fund information on an ongoing basis to support its published rating opinions. If the portfolio credit score meets the benchmark of the assigned rating during the review, the rating is retained. In an event that the benchmark credit score is breached, ICRA gives a month's time to the debt fund manager to bring the portfolio credit score within the benchmark credit score. If the debt fund manager is able to reduce the portfolio credit score within the benchmark credit score, the rating is retained. If the portfolio still continues to breach the benchmark credit score, the rating is revised to reflect the change in credit quality.

The views of the Fund Manager should not be construed as an advice and investors must make their own investment decisions regarding suitability of the funds based on their specific investment objectives and financial positions and using such independent advisors as they believe necessary.

Mutual Fund investments are subject to market risks, read all scheme related documents carefully.
