Investment in Corporate Debt Market Development Fund

In accordance with the requirement of regulation 43A of SEBI (Mutual Funds) Regulations, 1996 read with SEBI circular no. SEBI/HO/IMD/PoD2/P/CIR/2023/129 dated July 27, 2023 on Investment by Mutual Fund Schemes and AMCs in units of Corporate Debt Market Development Fund, scheme shall invest 25 bps of its AUM as on December 31, 2022 in the units of the Corporate Debt Market Development Fund ('CDMDF') within 10 working days from the request of CDMDF. Further, an incremental contribution to CDMDF shall be made every six months within 10 working days from the end of half year starting from December 2023 to ensure 25 bps of scheme AUM is invested in units of CDMDF. However, if AUM decreases there shall be no return or redemption from CDMDF. Contribution made to CDMDF, including the appreciations on the same, if any, shall be locked-in till winding up of the CDMDF.

However, in case of winding up of contributing Scheme, inter-scheme transfers within the same Mutual Fund or across Mutual Funds may be undertaken.

Further, investments in CDMDF units shall not be considered as violation while considering maturity restriction as applicable for various purposes (including applicable Investment limits) and the calculations of Potential Risk Class (PRC) Matrix, Risk-o-meter, Stress testing and Duration for various purposes shall be done after excluding investments in units of CDMDF.

Portfolio Rebalancing

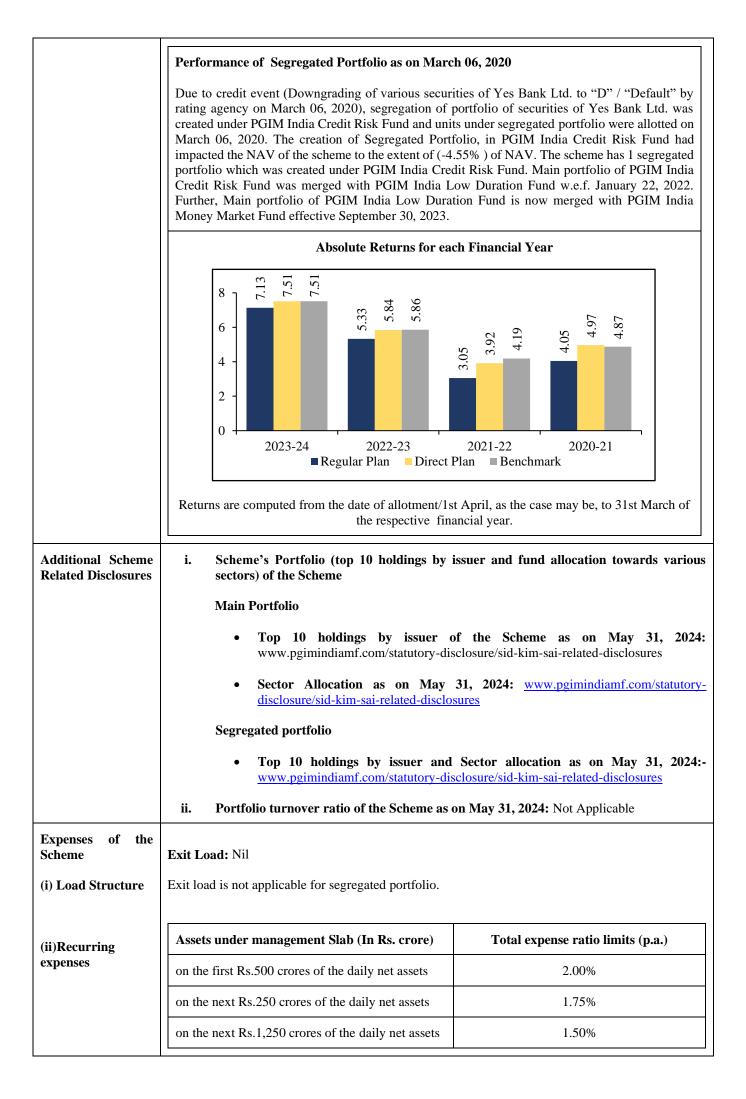

In accordance with paragraph 2.9 of SEBI Master Circular for Mutual Funds dated May 19, 2023, in case of deviation from the mandated asset allocation due to passive breaches (occurrence of instances not arising out of omission and commission of AMCs), the portfolio would be rebalanced within 30 business days from the date of deviation. Where the portfolio is not rebalanced within 30 business days, justification for the same shall be placed before the Investment Committee and reasons for the same shall be recorded in writing. The Investment Committee, if so desires, can extend the timelines

	up to sixty (60) business days from the date of completion of mandated rebalancing period. However, at all times, the portfolio will adhere to the overall investment objective of the scheme.		
	In case the portfolio of schemes is not rebalanced within the aforementioned mandated plus extended timelines, AMCs shall:		
	i. not be permitted to launch any new scheme till the time the portfolio is rebalanced. ii. not to levy exit load, if any, on the investors exiting such scheme(s)		
	Short term defensive consideration:		
	Due to market conditions, the AMC may invest beyond the range set out in the asset allocation. Such deviations shall normally be for a short term and defensive considerations in line with paragraph 1.14.1.2(b) of SEBI Master Circular for Mutual Funds dated May 19, 2023 and the fund manager will rebalance the portfolio within 30 calendar days from the date of deviation.		
Investment Strategy	The investment objective of the Scheme is to generate returns by investing in money market securities with maturity of up to 1 year. These securities include commercial papers issued by corporations, commercial bills, treasury bills, Government securities having an unexpired maturity up to one year, call or notice money, certificate of deposits, usance bills, and any other like instruments as specified by SEBI and RBI from time to time.		
	Investment in Fixed Income Derivative Instruments:		
	SEBI has vide its paragraph 12.28.1.4 of Master Circular on Mutual Funds dated May 19, 2023, permitted all mutual funds to participate in derivatives trading subject to observance of guidelines issued by SEBI in this behalf.		
	Pursuant to paragraph 7.5, 7.6 and 12.25 of SEBI Master Circular for Mutual Funds dated May 19, 2023 and such other circular issued by SEBI from time to time in this regard, the Scheme may use derivative instruments like Interest Rate Swaps, Forward Rate Agreements, stock future or other derivative instruments for the purpose of hedging and portfolio balancing or for its efficient management.		
	Derivative instruments offer unique advantages like security exposures without the attendant execution and settlement risk. Derivative instruments carry a high risk return ratio. It is like a insurance policy where one has to pay the premium up-front and the benefit is contingent upon an event. Derivative instrument if used on a leveraged basis could distort the risk return ratio considerably even with a small price movement (the scheme will not take a leveraged exposure). It requires a high level of knowledge, understanding and surveillance to control risk.		
	The Scheme may use derivative instruments primarily to protect the value of portfolio against potential risks such as interest rate risk, credit risks, reinvestment risk and liquidity risks. This protection is also known as hedge. At the same time, however, a properly correlated hedge will result in a gain in the portfolio position being offset by a loss in the hedge position. As a result, the use of derivatives could limit any potential gain from an increase in value of the position hedged. In addition, an exposure to derivatives in excess of the hedging requirement can lead to losses. IRS and FRAs do also have inherent credit and settlement risks. However, these risks are substantially reduced as they are limited to the interest streams and not the notional principal amounts.		
	Derivative instruments may take form of Interest rate swaps, Forward rate agreements and such other derivative instruments as may be available from time to time and appropriate for the portfolio. The Scheme, however, will use the derivative instruments very judiciously and keep in mind the overall objective the scheme.		
	For details of risk factors relating to use of Derivatives, the investors are advised to refer to Scheme Specific Risk Factors.		
	Risk Control		
	Since investing requires disciplined risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process.		
	The risk control process involves reducing risks through portfolio diversification, taking care however not to dilute returns in the process. The AMC believes that this diversification would help achieve the desired level of consistency in returns. Stock specific risk will be minimized by investing only in those companies that have been analyzed by the Investment Team at the AMC. For investments in debt securities, the AMC aims to identify securities, which offer superior levels of yield at lower		

keyls of risks. With the sim of controlling jisks, rigorous and in-depth credit evaluation of the securities proposed to be investment trand of the AMC.
