Where the portfolio is not rebalanced within 30 business days, justification for the same shall be placed before the Investment Committee and reasons for the same shall be recorded in writing. The Investment Committee, if so desires, can extend the timelines up to sixty (60) business days from the date of completion of mandated rebalancing period. However, at all times, the portfolio will adhere to the overall investment objective of the scheme.

In case the portfolio of schemes is not rebalanced within the aforementioned mandated plus extended timelines, AMCs shall:

- i. not be permitted to launch any new scheme till the time the portfolio is rebalanced.
- ii. not to levy exit load, if any, on the investors exiting such scheme(s).

**Short term defensive consideration:**

Due to market conditions, the AMC may invest beyond the range set out in the asset allocation. Such deviations shall normally be for a short term and defensive considerations in line with paragraph 1.14.1.2(b) of SEBI Master Circular for Mutual Funds dated May 19,

	<p>2023 and the fund manager will rebalance the portfolio within 30 calendar days from the date of deviation.</p>
<p><b>Investment Strategy</b></p>	<p>The total assets of the Scheme will be invested primarily in equity and equity related instruments. The portfolio will be diversified across sectors. The portfolio is expected to have minimum 25% allocation towards large cap, midcap and small cap segments of the market respectively under normal circumstances. Companies with long term growth potential and sustainable business models are preferred. The portfolio is built utilizing a combination of the top-down and bottom-up portfolio construction process, focusing on the fundamentals of each stock, including quality of management and prevailing valuations.</p> <p>The Scheme shall primarily use a bottom-up approach to identify companies with sound management and good growth prospects and a top-down approach for macro and thematic analysis. The fund manager(s) would select companies with stable or high growth with due consideration to valuation. The fund manager(s) would consider a range of quantitative and qualitative factors such as company’s business prospects, historical and present financial condition, capital allocation efficiency, operating cash flows, leverage position, valuation metrics, competitive edge, brand equity, strength of management and good corporate governance practices among others.</p> <p>The scheme may also invest in turn-around companies based on Fund manager’s view. All investments would be subject to regulatory limits for stock and sector weightages.</p> <p><b>DERIVATIVE STRATEGIES</b></p> <p>The Scheme may invest in various derivative instruments which are permissible under the applicable regulations. Such investments shall be subject to the investment objective and strategy of the Scheme and the internal limits if any, as laid down from time to time. These include but are not limited to futures (both stock and index) and options (stock and index). Derivatives are financial contracts of pre-determined fixed duration, whose values are derived from the value of an underlying primary financial instrument such as interest rates, exchange rates, commodities and equities. There are several advantages in using derivatives in the portfolio. The use of derivatives provides flexibility to the Scheme to hedge whole or part of the portfolio.</p> <p>The risks associated with derivatives are similar to those associated with underlying investments. The additional risks of using derivative strategies could be on account of:</p> <ul style="list-style-type: none"> <li>• Illiquidity;</li> <li>• Potential mispricing of the Futures/Options;</li> <li>• Lack of opportunity;</li> <li>• Inability of derivatives to correlate perfectly with the underlying (Indices, Assets, Exchange Rates);</li> <li>• Cost of hedge can be higher than adverse impact of market movements;</li> <li>• An exposure to derivatives in excess of the hedging requirements can lead to losses;</li> <li>• An exposure to derivatives can also limit the profits from a genuine investment transaction.</li> <li>• The prices which are seen on the screen need not be the same at which execution will take place.</li> </ul> <p>For detailed risks associated with use of derivatives, please refer paragraph “Scheme Specific Risk Factors”</p> <p>For further details regarding concepts and examples of derivatives that may be used by the fund manager, please refer to SAI.</p>

	<p><b>Securitisation – Concept</b></p> <p>Asset securitisation is a process whereby commercial or consumer credits are packaged and sold in the form of financial instruments. A typical process of asset securitisation involves sale of specific Receivables to a Special Purpose Vehicle (SPV) set up in the form of a trust or a company. The SPV in turn issues financial instruments (e.g., promissory notes, pass through certificates or other debt instruments) to investors, such instruments evidencing the beneficial ownership of the investors in the Receivables. The financial instruments are rated by an independent credit rating agency. An Investor’s Agent is normally appointed for providing trusteeship services for the transaction.</p> <p>On the recommendation of the credit rating agency, additional credit support (Credit Enhancement) may be provided in order that the instrument may receive the desired level of rating. Typically the servicing of the Receivables is continued by the seller in the capacity of the Servicer. Cash flows, as and when they are received, are passed onto the investors.</p> <p><b>Risk Control</b></p> <p>Since investing requires disciplined risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process.</p> <p>The risk control process involves reducing risks through portfolio diversification, taking care however not to dilute returns in the process. The AMC believes that this diversification would help achieve the desired level of consistency in returns. Stock specific risk will be minimized by investing only in those companies that have been analyzed by the Investment Team at the AMC. For investments in debt securities, the AMC aims to identify securities, which offer superior levels of yield at lower levels of risks. With the aim of controlling risks, rigorous and in-depth credit evaluation of the securities proposed to be invested in, will be carried out by the investment team of the AMC. Rated Debt instruments in which the Scheme invests will be of investment grade as rated by a credit rating agency. The AMC will be guided but not limited by the ratings of Rating Agencies such as CRISIL, CARE, ICRA and Fitch or any other rating agencies that may be registered with SEBI from time to time. In case a debt instrument is not rated, investment will be in accordance with Guidelines approved by the Board.</p> <p>The Scheme may also use various derivatives and hedging products from time to time, as would be available and permitted by SEBI, in an attempt to protect the value of the portfolio and enhance Unitholders’ interest.</p> <p><b>Portfolio Turnover</b></p> <p>The Scheme is an open-ended scheme. It is expected that there would be a number of subscriptions and redemptions on a daily basis (subject to completion of lock-in period). Consequently, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio.</p>
<p><b>Risk Profile of the Scheme</b></p>	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Investment in the scheme will involve certain Scheme specific Risk Factors which are summarized below:</p> <ul style="list-style-type: none"> <li>• Due to lock-in requirements under the Scheme, the ability of the unit holders to redeem units and realise returns is subject to the completion of the said lock in period.</li> <li>• The Schemes carries risk associated with investing in equity market, which may be volatile and hence prone to price fluctuation on a daily basis. Investment in equities involves a high degree of risk and investors with low risk appetite should not invest in the equity oriented schemes, as there is a risk of losing their investment.</li> </ul>
